MWKST- MF- hPSC medium change

Massachusetts General Hospital Founding Member, Mass General Brigham	George A. "Doc" Lopez, MD Laboratory for Regenerative Cell Therapy White 536, 55 Fruit St, Boston, MA 02114

Process	hPSC medium change	Date	06 Mar 26
Time	1:31 PM	Operator	Harrison Hsiang

Medium volume for different vessel:

10-cm dish	10 mL	6-cm dish	5 mL
75 cm2 flask	15 mL	25 cm2 flask	5 mL
6 well plate	2 mL	12 well plate	1 mL
24 well plate	0.5 mL	8 well chamber	0.3 mL

Bill of Materials:

Cells	hPSC in culture	Cell type	PD05-mR01, mR03 hiPSC
# Passage	9, 7	Dish size	6 cm.
# of dishes	2, 2	Cell condition	Good; ~60%, ~50% confluency

Reagent	Lot#	Amount /container	# of container	Expiry date
Nutristem	250400812	40 mL	1	14 Jul 2026

Manufacturing Steps:

Step	Instruction	Data
1	Warm up the NutriStem hPSC XF medium in bead bath for 30 min.	☑
2	Take the hPSC dishes out of incubator.	Time out: 1:31, 1:36 PM
3	Add 5 mL NutriStem hPSC XF medium to each 6-cm dish.	Volume added: 5 mL/dish # of dishes: 4
4	Put the dishes back in the incubator.	Time in: 1:35, 1:40 PM

Comments: PD05-mR03 hiPSC dish #2 is experiencing high cell death in the center of the dish but the colonies on the outer rim look good.
